ACCESS SERVICE

SECTION 3. CARRIER COMMON LINE ACCESS SERVICE (Cont.)

3.6 Rate Regulations (Cont.)

3.6.4 Determination of Charges (Cont.)

(D) The originating Access, per minute charge(s) apply to:

- all originating access minutes of use;
- less those originating access minutes of use associated with FGA Access Services where the off-hook supervisory signaling is forwarded by the customer's equipment when the called party answers;
- less all originating access minutes of use associated with calls placed to 700, toll free and 900 numbers;
- plus all originating access minutes of use associated with calls placed to 700, toll free and 900 numbers for which the customer furnishes for each month a report of either the number of calls or minutes or a report of the percent of calls or minutes that terminate in a Switched Access Service that is assessed Carrier Common Line charges, and for which a corresponding reduction in the number of terminating access minutes of use has been made as set forth in (D) preceding.

3.7 Federal Universal Service Charge

The Federal Universal Service Charge (FUSC) recovers the Telephone Company's contribution to various federal universal service funds. The Telephone Company will apply the FUSC Surcharge Factor each month to the billed charges for interstate access services provided to end users from this Tariff and to any other interstate services provided directly to end users.

The FUSC Surcharge Factor will not apply to interstate access services or other interstate purchased by customers that resell these services to end users as part of an interstate telecommunications service and are required to contribute to the various federal universal service funds.

IF a customer is reselling services and contributing to the various federal universal service fund the telephone company requires an annual certification to that effect.
